

ANNEX 3-D

PRODUCT-SPECIFIC RULES OF ORIGIN

Section A: General Interpretative Notes

For the purposes of interpreting the product specific rules of origin set out in this Annex the following definitions shall apply

section means section of the Harmonized System

chapter means chapter of the Harmonized System

heading means the first four digits of the tariff classification number under the Harmonized System and

subheading means the first six digits of the tariff classification number under the Harmonized System

2 Under this Annex a good is an originating good if it is produced entirely in the territory of one or more of the Parties by one or more producers using non-originating materials and

each of the non-originating materials used in the production of the good satisfies any applicable change in tariff classification requirement or the good otherwise satisfies the production process requirement, regional value content requirement or any other requirement specified in this Annex and

the good satisfies other applicable requirements of Chapter Rules of Origin and Origin Procedures

For the purposes of interpreting the product specific rules of origin set out in this Annex

the specific rule or specific set of rules that applies to a particular heading, subheading or group of headings or subheadings is set out immediately adjacent to the heading, subheading or group of headings or subheadings

section, chapter or heading notes here applicable are found at the beginning of each section or chapter and are read in conjunction with the product specific rules of origin and may impose further conditions on or provide an alternative to the product specific rules of origin

- c the requirement of change in tariff classification shall apply only to non-originating materials
- d if product specific rule of origin includes certain materials of the Harmonized System it shall be construed to mean that the product specific rule of origin requires that the excluded materials be originating for the good to be originating
- e if good is subject to alternative product specific rules of origin the good shall be originating if it satisfies one of the alternatives
- f if good is subject to product specific rule of origin that includes multiple requirements the good shall be originating only if it satisfies all of the requirements and
- g if single product specific rule of origin applies to a group of headings or sub-headings and that rule of origin specifies change of heading or sub-heading it shall be understood that the change in heading or sub-heading may occur from any other heading or sub-heading as the case may be including from any other heading or sub-heading within the group

4. The product specific rules of origin for textile or apparel goods as defined in Chapter 4. Textile and Apparel Goods are contained in Annex 4. A Textile and Apparel Product Specific Rules of Origin

For goods of chapters 4 and 5 covered with any option methodology for satisfying the region value content requirement of the product specific rule of origin shall apply. This methodology is contained in Appendix Provisions Related to the Product Specific Rules of Origin for Certain Chapters and Parts of Chapters to this Annex

Goods produced from petroleum distillation only include liquefied petroleum gases in the form of propane, propene, diesel, heating oil, light gases and naphtha. Liquefied petroleum gas distillation is used for distilling high boiling and heat sensitive materials such as heavy distillates in petroleum oils to produce light to heavy vacuum gas oils and residues. In some refineries, gas oils may be further processed into naphtha oils.</p>
	<p>Heading Note 2: Direct Blending Rule</p> <p>Notwithstanding the application of product specific rules of origin, goods of heading 2701 which undergo direct blending in the territory of one or more of the Parties is an originating good. For the purposes of this rule, direct blending means process whereby various petroleum streams from processing units or petroleum components from holding or storage tanks are combined to create finished product with predetermined parameters provided that the non-originating material of heading 2701 constitutes no more than 2% by volume of the good and no component of that non-originating material is classified under heading 2701.</p>
	<p>Heading Note 3: Diluent Rule</p> <p>For the purposes of determining whether or not goods of heading 2701 is an originating good, the origin of diluent of heading 2701 or 2702 which is used to facilitate the transportation between Parties of crude petroleum oils and crude oils obtained from bituminous minerals of heading 2701 is disregarded provided that the diluent constitutes no more than 1% by volume of the good.</p>

<p>Notwithstanding the applicable product specific rules of origin, good of chapter 28 through 2839 or chapter 29 that is subject to purification is originating good if that purification occurs in the territory of one or more of the Parties and results in the elimination of not less than 1 per cent of the content of existing impurities</p>	
<p>Section Note 3: Mixing and Blending Rule</p>	
<p>Notwithstanding the applicable product specific rules of origin, good of chapter 28 or heading 2802 or 2803 is originating good if in the territory of one or more of the Parties, the determined proportionally controlled mixing or blending including dispersing of materials to conform to predetermined specific conditions results in the production of good having physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials</p>
